

Belconnen High School

COURSE OUTLINE Semester 2, 2026

Course Title: **9 Women in Construction**

Faculty: **Work Studies**

Faculty Head: Jo Hopman

Description of Course

The Women in Construction elective offers high school students a tailored, industry-focused experience aligned with the Work Studies Curriculum to break down barriers and help young women and gender-diverse students explore careers in building and construction.

Learning Outcomes

- Understands the importance of growing self-awareness in improving learning, accessing work opportunities and developing appropriate skills and making more-informed subject and career choices
- Understands the importance and components of self-directed and lifelong learning
- Investigates the skills and personal qualities associated with a range of occupations and explain the importance of teamwork and collaboration
- Identifies the contribution of diverse cultures to work and workplaces
- Researches and filters relevant career information resources

Materials Required

Students will have access to a google classroom where class tasks and assessment items will be displayed, therefore a device is required. The assessment dates for this subject will appear on the students google calendar. Students can refer to the BHS Study Skills Guide and the BHS website for assistance with assessment tasks. The Assessment and Reporting Policy is available on the school website. Items Required Chromebook or suitable device Notebooks, pencil case and equipment.

Homework Required

Students will be expected to complete a variety of tasks outside of class time. This may include, teacher-set homework, research for tasks, revision for tests, review of class work and more.
